ATTACK SURFACE DISCOVERY

ASSESSMENT REPORT

Target: tesla.com

Assessment Date: 2026-06-17 02:01

Prepared By: Attack Surface Discovery Toolkit

Classification: Internal - Confidential

Risk Rating: High Risk

Attack Surface Score: 57/100

Confidential - For Internal Use Only

Executive Summary

Executive Risk Matrix

Severity	Count	Impact
Critical	0	Immediate Action
High	2	High Priority
Medium	1	Standard Priority
Low	1	Routine Priority
Info	2	Informational

Overall Score: 57/100

Risk Rating: High Risk

Management Summary

The assessment identified 2 high-severity weaknesses. No critical vulnerabilities were found.

Remediation Roadmap

Prioritized remediation plan based on severity:

P2 - High: Poor security headers score: 40/100 (+15 pts)

Recommendation: Implement missing HTTP security headers such as Content-Security-Policy, X-Frame-Options, X-Content-Type-Options, Referr...

P2 - High: 500 unmanaged assets discovered via Certificate Transparency logs (+15 pts)

Recommendation: Immediately review all CT-discovered assets. Many may be forgotten subdomains, test environments, or outdated services t...

P3 - Medium: Missing X-Frame-Options header (+8 pts)

Recommendation: Add X-Frame-Options or CSP frame-ancestors protection....

P4 - Low: Missing X-Content-Type-Options header (+3 pts)

Recommendation: Add X-Content-Type-Options: nosniff....

P5 - Informational: HTTP port 80 is open (+1 pts)

Recommendation: Ensure HTTP redirects securely to HTTPS....

Technical Findings

High: Poor security headers score: 40/100

Recommendation: Implement missing HTTP security headers such as Content-Security-Policy, X-Frame-Options, X-Content-Type-Options, Referrer-Policy to reduce browser-based attack surface.

Medium: Missing X-Frame-Options header

Recommendation: Add X-Frame-Options or CSP frame-ancestors protection.

Low: Missing X-Content-Type-Options header

Recommendation: Add X-Content-Type-Options: nosniff.

Informational: HTTP port 80 is open

Recommendation: Ensure HTTP redirects securely to HTTPS.

Informational: Microsoft 365 Autodiscover endpoint detected

Recommendation: Ensure Exchange Online and autodiscover settings are securely configured.

High: 500 unmanaged assets discovered via Certificate Transparency logs

Recommendation: Immediately review all CT-discovered assets. Many may be forgotten subdomains, test environments, or outdated services that pose significant security risks. Consider implementing automated asset discovery and inventory management.

Vulnerability Intelligence

Detected Technologies: AkamaiGHost

No mapped CVEs found for detected technologies.

This may indicate that the technologies in use are not associated with known vulnerabilities, or that the assessment did not detect version-specific details.

Confidential - For Internal Use Only

Asset Discovery

Discovered Unique Assets (3)

autodiscover.tesla.com, shop.tesla.com, www.tesla.com

Hidden Assets Found via CT Logs (500 total) - Risk Level: HIGH

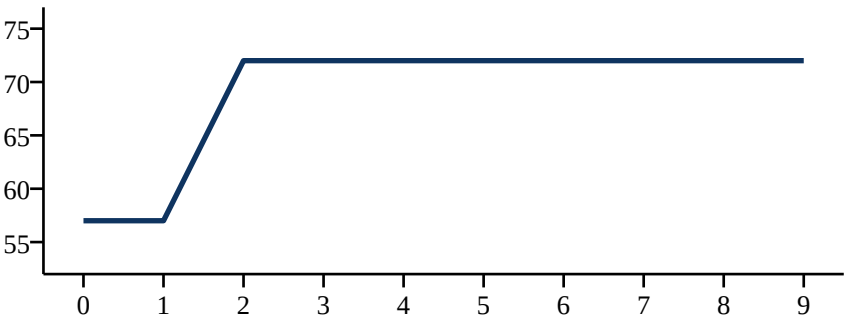

acme-sentry-4.eng.use1.vn.cloud.tesla.com, acme-sentry-4a.eng.use1.vn.cloud.tesla.com,
acs2-poc.voice.tesla.com, ai-api-stg.tesla.com, ai-api-uat.tesla.com, ai-api.tesla.com,
akamai-apigateway-einvoicing-stg.tesla.com,
akamai-apigateway-vehicleextinfogw-prdsvc-st.tesla.com,
akamai-apigateway-vehicleextinfogw-stgsvc-st.tesla.com, ams13-gpgw1.tesla.com
... and 490 more
